DETAILED ACTION

Allowable Subject Matter

1. Claims 1-27 are allowed.

2. The following is an examiner's statement of reasons for allowance:

The prior art does not disclose applicant's claimed methodology [claims 1-9 and 22-27], the methodology executable by machine as a program of instructions [claims 19-21], and system suitable for practicing the methodology [claims 10-18], related to analyzing leakage current luminescence in CMOS circuits.

Applicant's claimed methodology can be distinguished from prior art by a separating into two groups with a first group analyzed based on presence of absence of leakage light and a second group analyzed based on modulation of the intensity of light, *to determine values for given parameters of the circuits* [e.g. claims 1-9 and 19-21].

Applicant's claimed methodology can also be distinguished from prior art by determining relationships between leakage light and values of parameters of the circuits such as temperature [e.g. claims 22-23], crosstalk [e.g. claims 24-25], and noise from a power supply [e.g. claims 26-27].

Applicant's system as claimed [i.e. claims 10-18] can be distinguished from prior art by the two claimed "means for analyzing," which collectively enable analyzing the first and second groups of CMOS circuits in accordance with the claimed methodology.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references cited disclose luminescence measurements of CMOS, but do not disclose the methodology and system claimed by applicant.
